digital microscope

Visus Zip

The Visus Zip inspection system from Visus technology combines the FHD technology's supremely sharp images and the microscopes ability to magnify

Visus Zip - a totally new experience!

Clear Imaging: Get amazing picture quality with every detail sharp and colors true to life.

Built to Last: The sturdy, one-piece design is eco-friendly and requires less maintenance, helping your equipment last longer and work more efficiently.

Easy Magnification View: See the magnification level in real-time, so you can adjust quickly and easily.

User friendly

The camera in the MagniLink Zip can be easily rotated and is fully adjustable both vertically and horizontally, making it ideal for industrial inspections where flexibility is key. This system is particularly suited for professionals who need to move between different workstations or inspection areas. A mirror mode is also available, which can be helpful for tasks requiring detailed precision, such as when inspecting fine components.

The control panel, featuring tactile buttons and knobs, is intuitive and easy to operate, even in fast-paced environments. For those needing more advanced functionality, additional features are also available, providing greater control over the inspection process.
